

Power Generation

Aurora Technologies, Inc. (ATI) is a respected manufacturer of rigid electrical insulation components for the repair, maintenance and manufacture of power generators.

We have the capabilities of supplying Insulation Kits for:

- Hydro Generators
- Nuclear Generators
- Fossil Fuel Generators

We have a global presence offering materials and components that meet:

- UL
- DIN
- NEMA
- BS

ATI understands that each power generator requires custom parts and the parts list is unknown until a complete analysis or review on the unit is finalized. We have the ability to manufacture all of the required components either from CAD drawings or sample parts. ATI keeps the generator down time to a minimum due to our extensive inventory, capacity, and flexibility. ATI prides itself on being the most responsive supplier in the industry.

Materials of choice include:

- NEMA Grade G-9
- NEMA Grade G-10 (Non-Brominated)
- NEMA Grade G-11 (Non-Brominated)
- NEMA Grade CE
- NEMA Grade LE
- NEMA Grade GPO-1 (Including Class F materials)
- NEMA Grade GPO-2
- NEMA Grade GPO-3
- Nomex
- Semi Conductive Laminates

Listed are a few types of products that ATI is capable of supplying:

- Tapered and Flat Stator Wedges
- Stator Insulation Filler Materials
- Top and Side Ripple Springs
- Coil Blocking
- Retaining Ring Insulation
- Washer and Bushings
- Pole Collars
- Spacer Blocks
- Turn Insulation
- Top and Side Ripple Springs
