

Aurora Technologies, Inc.

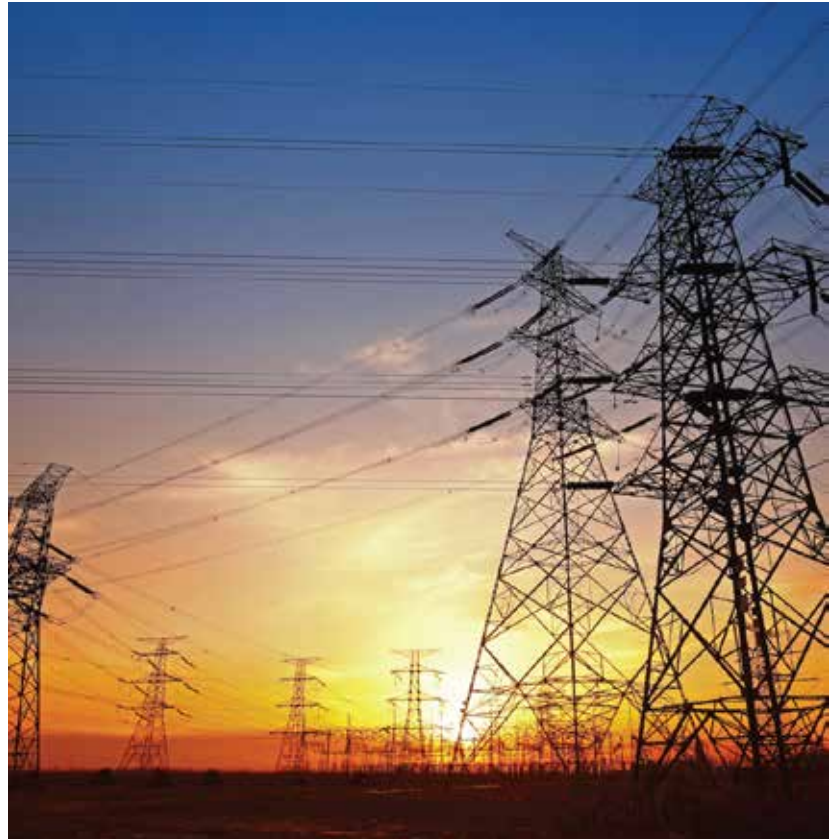

Electrical Applications

Aurora Technologies, Inc.

is a critical supplier of components utilized in the generation and distribution of electricity. Non-metallic materials are ideal for electrical applications due to their ability to withstand high voltages and temperatures without decay.

ATI supplies components meeting standards including UL, DIN, NEMA, and BS. All parts are inspected with rigorous quality control procedures. By housing an extensive inventory and a high degree of flexibility, we lead the industry as a responsive supplier of quality custom parts.

In more than 300,000 sq. ft. of warehouse and manufacturing space, we stock a wide range of materials and specialized machinery, allowing us to deliver your parts quickly.

Typical Applications

- Switchgear
- Switchboards
- Transformers
- Motors
- Uninterruptible Power Supplies (UPS)
- Generators
- Motor Control Centers

Typical Materials

- GPO-1
- GPO-2
- GPO-3
- SG-200
- FRPP
- FR-700
- G10/FR-4
- G11/FR-5
- Valox
- Nomex
